Quality guaranteed Outstanding **performance**

Génia

Since Génia's inception in 1945, the innovation driving our growth has made us a market leader, providing specialised solutions to veterinarians worldwide.

Génia is a family-owned company headquartered in St. Hilaire de Chaléons, France with over seventy years in the veterinary supply industry.

Our spearhead product was the cutting-edge Plexiglass syringe, Géniaplex. Today, we manufacture over 2,500 premium SKUs under nine product ranges in over seventy countries.

Our branches in France, Australia, Hong Kong and USA help us acquire top insight into the global veterinary market.

Our consistent goal is to provide veterinary professionals with quality products that elevate their practices, with an emphasis on improving the comfort and hygiene of the animal.

The Group

Staff : 100 people, with our head office in Saint-Hilaire de Chaléons (44), FRANCE.

The Australian Branch

In 2011, we established a subsidiary in Sydney to cover Australia with our range of veterinary supplies. Génia products are available through all the main wholesalers. Our sales team is constantly listening to their customers: improving our existing products, dealing with vets and nurses needs, and imagining the products of tomorrow.

Visiting vet clinics - on a daily basis - and promoting our products help us to maintain a close contact with animal health professionals. The demand for Génia products is constantly growing, as well as our local team.

ELIZABETHAN COLLARS

SMALL ANIMALS

Our range of Elizabethan Collars has been carefully thought out to fit all vet practices needs, thanks to the following features:

Our well-known **quick fastening system**: Release the E-Collar by bending the inside part completely back, until it marks white.

Scalloped edge: The wavy outer edge makes them sturdier and less sharp on your legs.

Smart hanging system: The open storage hole allows you to store each E-Collar on the same hanger; pull off just the one you need. Save space and time!

Colour coded according to the size: For better recognition, it makes your life easier.

3 to 5 neck adjustments: To get the perfect snug fit for any animals.

TESTIMONIALS

FUNCOL®

MANJIMUP VET CLINIC, WA Shannon, Vet Nurse

Genia E-collars are perfect, easy to put together compared to others brands.

EAGLEHAWK ROAD VET CLINIC, VIC

Hanna, Vet Nurse

ANIMALS.

Funcol E-collars are nice and fun! It's better to bring back the patient with cute little paw prints on the e-collar.

SWEET PEA ANIMAL HOSPITAL, NSW Samantha, Practice Manager

We switched to Funcol E-collars because we like the paw prints pattern, we found them nicer than plain ones. We never had any issue with them so far!

NEOCOL®

EASTERN SHORE, TAS

Kea, Practice Manager I like Neocol E-collars because of their soft edges and the fact they are reflective. They are also easy to pull apart when they are in the wrong side.

TASMANIAN ANIMAL HOSPITALS - SORELL, TAS Jacinta, Head Vet Nurse

The Neocol E-collars are not sharp, which is perfect when pets are running into furnitures. They are really comfortable for them and a lot easier than others e-collars.

ARMSTRONG CREEK VET PRACTICE, VIC Rachel, Vet Nurse

We love the Neocol E-collars, they are easy to click! The soft edge protects the patient from scratching himself.

KUDAH VETERINARY SERVICES, WA Amy, Vet Nurse

We like the Neocol E-collars because they are user-friendly; they're a nicer for your legs when pets run into you.

DANDENONG RANGES VET CLINIC, VIC Elissa, Vet Nurse

We use the Neocol mostly for smaller animals (such as puppies or kittens) or for scared patients, as it is more comfortable for them.

TRANSCOL

S

NO

S Ш

THE ANIMAL HOSPITAL KALGOORLIE, WA Marge, Practice Manager

We like the colourful Genia E-collars. They are quite sturdy and last really well.

GREENCOL

HAMILTON HILL VET HOSPITAL, WA Bruce, Vet Nurse

The Greencol E-collars are fantastic. They are pretty easy to put together and are durable.

ULVERSTONE VET CLINIC, TAS Shanna, Practice Manager

The Greencol E-collars are cheaper than Buster. We also like the fact we can hang them on the same hook, and pull the one we need without taking off the others ones, thanks to the opened hole.

VETS IN ENDEAVOUR HILLS, VIC Jessikah, Vet Nurse

The Greencol E-collars are easy to put together and last longer than others brands. On top of that, they are cost effective!

BRIGHTON VETERINARY SERVICES, TAS Karinda, Practice Manager

We find the Greencol \bar{E} -collars more comfortable than everything, they are softer on the neck. They are easy to put too.

VELFAST

CLAREMONT VETERINARY SURGERY, TAS Kathryn, Nurse

The Velfast E-collars are really convenient. They get on and off quite easily. I also like the soft edge on the neckline. The Velcro is strong, making the E-collar re-usable, compared to a clickable E-collar, less sturdy. They look nice too.

PAUL'S VETERINARY CLINIC, TAS Jess, Vet Nurse

The Velfast E-collars are easy to put on. They're ideal for patients with small neck, as we can easily adjust them; not too loose or too tight. They're comfortable for the animals. Nice and easy.

LISMORE CENTRAL VET, NSW Susan, Clinic Manager

We switched to Velfast E-collars for a year now. Even though they're a bit more expensive, they're worth every penny for the convenience;Genia products are Genius!

GREENCROSS O'CONNOR, WA

Samantha, Practice Manager

The Velfast are so EASY and comfortable for the patients; we love them! We use mostly those ones now!

CARLTON VET SURGERY, VIC

Clare, Practice Manager

Loving the velcro collars, we will be using up our stock of standard click collars and moving onto those permanently.

GREENVALE ANIMAL HOSPITAL, VIC

Nicki, Nurse

The Velfast E-collars are easy to fit! The color-coded system makes them easy to identify as well. Pets like them as they can see through thanks to the clear finish.

MELBOURNE EYE VET, VIC Tracey, Vet Ophtalmic Nurse

Dogs tolerate more the Velfast E-collars than any others e-collars, as they are more comfortable. Owners are surprised by this product, and gratful because their pets are less stressed.

COSYPAD®

Non-absorbent meshed mat providing comfort and hygiene; it has become a clinic favourite!

♦ As the COSYPAD[®] is non-absorbent, it allows liquids to pass through the mat, leaving the animal dry. Perfect to use in your cages for incontinent patients or when waking up from GA's. It minimizes pressure on muscles, joints, and prevents bedsores, making it ideal for overnight patients.

Inhanks to its anti-slip layer, the COSYPAD® is ideal to use on your consult or surgery tables. The meshed material provides an optimal comfort and ventilation, as well as a thermal barrier to cold tables. It is also known to be a good insulator, and can be used with a heat mat.

 $\ensuremath{\overrightarrow{\text{m}}}$ The small COSYPAD® makes a great dental mat: place the head of the animal on top of the mat while descaling, and let liquids drain through.

Tired ? Use your COSYPAD® as an anti-fatigue mat !

Last but not least...

Easy to clean: COSYPAD[®] is machine washable (up to 40°c) and dries quickly even in winter.

Chew & stain resistant: COSYPAD® is meant to last a few years !

Code	Size	Use
327200	33 x 50 cm	Ideal for dental
327201	39 x 71 cm	Ideal for cages / consultation tables
327203	55 x 71 cm	Ideal for cages / consultation tables
327205	60 x 115 cm	Ideal for bottom cages / floor

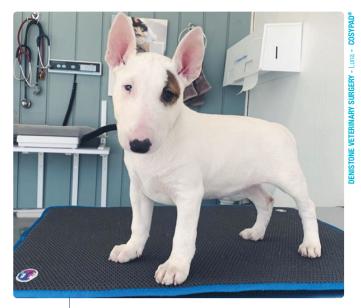

Perfect to protect from the cold of consultation tables

SUPERVETS, QLD

Anthony, Vet

"As a veterinary nurse for 12 years before a practicing vet, I can thoroughly appreciate the sheer amount of cleaning, washing and disinfecting required in day to day operations of a hospital. We want out patients to be comfortable and warm and are always looking to improve hospital care and efficiencies when dealing with bodily excrements.

When Génia introduced their new Cosypad[®] we trialed them, and within weeks filled every cage in 2 24hr hospitals with them as routine. Now every patient has a comfortable non slip bed which keeps them off cold surfaces and prevents urine scalding. Being hygienically washable means we have drastically reduced our use of towels and the costs of washing as a consequence. We have also found them particularly useful as a non-slip surface in consult and prep benches, and routinely use them as the resting surface for patient heads during dental procedures, with pee pads underneath keeping their face far cleaner. Very useful in the car too ! We absolutely love them! :) "

Ideal for dental surgeries

TASMANIAN ANIMAL HOSPITALS - SORELL, TAS Jacinta, Head Vet Nurse

We got a couple of Cosypads, to use in cages, before and after surgeries. We like to use them as well for our dental surgeries.

THE CAT CLINIC HOBART, TAS Michelle, Head Vet Nurse

ഗ

We use the small Cosypad mostly for our dental procedures. As the liquids go through, it keeps the cat dry. We like to use it as well on our consultation tables, during vaccinations or when taking blood samples. The mat doesn't move thanks to its anti-slip layer.

RISELEY VET CLINIC, WA Amy, Vet

We put our Cosypad in our kennels as it has anti-slip layers.

DROUIN VET CLINIC, VIC Linda, Practice Manager

We like that the Cosypad is machine washable. The soft padding makes it ideal for orthopaedic recoveries.

LYNWOOD VET CLINIC, WA

Louise, Vet

The Cosypad padding is really good as it avoids pressure sores. We use the mat also for our dental procedures.

CANNINGTON VET, WA Trevor, Vet

We value the Genia Cosypad for its efficiency in keep our patients on a dry comfortable surface but also for its hardwearing quality and ease of cleaning. Would recommend as a good investment.

WAUCHOPE VETS, NSW

Sarah, Vet Nurse

We use our Cosypad for all our dentals. As the liquids go through, the patient doesn't sit in a cold wet surface. And it's easy to wash! We like as well its non-slip layers.

COHUNA BORDER VETS, VIC

Kelly, Vet Nurse

We use the Cosypad in our cages. As the liquids go through, the patients don't stay in their own wee. We use it as well on our examination table because it has anti-slip layers.

NORTH COAST VETERINARY SERVICES, NSW Lauren, Vet

We are currently using the Cosypad for a dog with snake bite paralysis, and they are going really well.

TAREE VET HOSPITAL, NSW April, Practice Manager

The Cosypads are great, we have been using them for dentals, also older dogs and longer staying patients in hospital.

génia

VACUUMAT®

VACUUMAT[®] lightweight positioning mat. Holds patients in the desired position prior to a surgical procedure, ultrasound, MRI, CT or X-ray (as radiolucent).

The insulation and shaping properties are achieved by microbeads. Made from a sturdy polyurethane material, it is very easy to clean. You can run it under a tap or simply wipe it down. The material is thick and resistant. It comes as a kit including the mat and an adapted vacuum pump.

🔯 How does it work ?

- 1. Lay the animal on the mat, in the desired position.
- 2. Close the valve.
- 3. Suck the air out of the mat with the adapted pump in less than 10 seconds. Et voilà!
- Why do you love it?
- The mat conforms to the body shape and holds the patient in place. The animal won't move or slide away.
- It is ideal for X-rays positioning, especially for hips and legs, that often require difficult angles.
- As it provides stable immobilization, the VACUUMAT® is also perfect for eye surgeries.
- The mat gets stiff while remaining flexible and very comfortable for the animal. The stiffness can be adjusted by slowly releasing the valve.

What else?

• The VACUUMAT[®] helps combat hypothermia. It keeps patients off cold surfaces, and it is highly insulating. The microbeads will hold and maintain patients' body heat and prevent a drop in temperature.

génia

HOSPITALIZATION

Michelle, Vet Nurse The Vacuumat is soft for the animals and keeps them in the position that we want.

CANNINGTON VET, WA

Trevor, Vet

∢

NNO

S

The Genia Vacuumat is so helpful and versatile for patient cushioning, insulation and positioning. We have been using them every day for surgery and radiographs for a couple of years now. It is easy to clean and showing no sign of wear. I can confidently recommend them.

NORTH HOBART VET HOSPITAL, TAS Ahli, Vet Nurse

The Vacuumat are fantastic! We have one small and one large that we use daily for our surgeries. They make it easy to position the patient how we want, rather than using it towels that don't hold well.

THE DOG CLINIC, TAS Rai, Vet

We love the the Vacuumat, we have one small and one large that we use mostly for our desexing procedures.

LOCKYER AVENUE VET HOSPITAL, WA

We were surprised to see how good the Vacuumat keeps the body warmth of the patient during the surgery.

TASMANIAN ANIMAL HOSPITAL - KINGSTON, TAS Nicole, Practice Manager

The Vacuumat is brilliant! Really simple to use; it's easy to get the correct position and stays there. We have it in our 3 clinics.

LARKHILL VETS, WA Hayley, Head Vet Nurse

The Vacuumat makes the animal more comfortable. It's way better to position him. It's simply awesome! We use it for both surgery and X-rays.

CAMBERWELL VET CLINIC, VIC Vivian, Vet Nurse

The Vacuumat is a big help, especially for deep chested dogs such as greyhounds! We mostly use it for our CT scans.

VICTORIA PARK VET CLINIC, WA

Monique, Vet Nurse We have the Vacuumat in 2 sizes; it's much better than using sand bags!

PORT MACQUARIE VET HOSPITAL, NSW

Dawn, Vet Nurse

We like how the Vacuumat is easy to use and to store. It's a reliable product.

BRIMBANK VET HOSPITAL, VIC Merinda, Practice Coordinator

The Vacuumat is quite handy; we use it mostly for our X-rays as we don't need to be in the room anymore to hold the patient. We use it as well for few surgeries, especially on rabbits.

TASMANIAN ANIMAL HOSPITALS - BELLERIVE, TAS

Claire, Practice Manager

I love the Vacuumat to position the patient on the surgery table. I use it every day.

HUON VALLEY VET HOSPITAL, TAS Sarah, Vet Nurse

The Vacuumat is quite good. We use it mostly for X-rays procedures and for tall animals as it holds their position.

LINDISFARNE VET CLINIC, TAS

Dr Sam, Vet

We find the Vacuumat convenient to mold around the patient body. We use it mostly to stabilise the animal on his back during surgery.

THE BARNYARD VET, TAS

Roz, Vet

The Vacuumat is easy! You don't need to worry to roll a towel, you just need to mold it around the patient, and you're good to go!

WENDOUREE CLINIC, VIC

Kylie, Head Vet Nurse

The Vacuumat is working well. It's ideal for small animals, especially to maintain them on their back; we use it for each surgery.

BICTON VET CLINIC, VIC

Kay, Vet

We use the Vacuumat for eye surgeries, as it maintains the patient on the correct orientation all along the operation.

WELLINGTON VILLAGE VET, VIC

Kelly, Vet Nurse

The Vacuumat is easier than sand bags. It's ideal to use for the vets, to position the patient.

TABLET CUTTER & CRUSHER

Our new tablet crusher is portable and easy to clean. Simply put the tablet in the device and screw the top to crush it. Spare tablets can be stored in the below compartment.

Sold individually.

BOTTLE TEATS

Non-perforated, natural latex teats for kittens and puppies. Fit on bottle necks. Certified 93/11/CE.

Sold individually.

Code	woder	Diameter
\rm A 227021	Kitten	13.5 mm stretched to 29.5 mm
B 227022	Puppy	14 mm stretched to 30 mm

BLUE PET PILLER

Pill popper with a soft atraumatic rubber tip end. Can be used with water to wash down the tablet.

- Flexy soft tip with good grip.
- Can be used with one hand.
- Add water into the syringe to facilitate the swallowing of the tablet.

Sold individually or in boxes of 12 pet pillers.

SEASY STEPS:1. Draw water into the pet piller
2. Add the pill into the rubber tip
3. Flush the tablet down the animal throat

PET PILLER

KINGS MEADOWS VET CLINIC, TAS Kay, Practice Manager

We like the size of the Pet Piller. We find it easy to use.

MAIN RIDGE VET, VIC

Jacqui, Practice Manager It's easy to use, I mix it with water.

KYOGLE VET CLINIC, VIC

Rebecca, Practice Manager It's convenient to use it with water. Really easy to use.

DOG ROCK VET CLINIC, WA Sam, Practice Manager

Genia Pet Piller is quite good! We like the fact we can use it with water; it encourages the patient to swallow, instead of spitting out the tablet.

MELBOURNE CAT VET, VIC Samara, Practice Manager

We like the fact Genia Pet Piller are smaller than regular ones, making it easier to use.

HEYWOOD VET CLINIC, VIC Tracy, Vet

The pet piller is really user-friendly. Pet owners find it easy to use, and don't come back complaining about it. Thanks to the water feature, it helps the automatic swallow reflex, which makes it less stressful for the patient.

	THE CHOICE DEPENDS ON THE VETERINARIA	N'S CLINICAL ASSESS	MENT
	TYPES OF WOUND	DRESSINGS	DRESSING CHANGE
	Wound in debridement stage or in granulation stage. Low/medium exudate wound without loss of substance.	HYDRO	Every three days on average. Change if discolored or swollen.
A A A	Wound from debridement to epidermization. Medium/high exudate wound aural hematoma.	SPONGI	When saturated or every five days.

ANIPLAST® HYDRO

Healing dressing. Second skin.

- Gelatine-free hydrocolloid layer applied to a waterproof polyurethane film.
- Maintains a moist and warm environment at the surface of the wound: promotes granulation and epithelialization along with wound self-debridement.
- Impermeable to bacteria.
- Sticky side on the wound.

Code Pack.		Dimensions	
327014	x 10	10 x 10 cm	
327016	x 5	20 x 20 cm	

ANIPLAST® SPONGI

Super absorbent dressing. Non-adhesive, semi-occlusive foam dressing on a thick water-resistant polyurethane film.

- To treat chronic and exuding wounds. Maintains a moist and warm wound environment, while limiting maceration and infection.
- Non-adherent : the dressing is suitable to use on fragile skin.
- Facilitate granulation and epithelialization.

TESTIMONIALS

GLOVES

ARMSTRONG CREEK VET PRACTICE, VIC Rachel, Vet Nurse

We never had any problem with Genia gloves. They are comfortable and smooth, without leaving your hands dry.

PERFUVET PLUG

RIVERTON ROSSMOYNE VET HOSPITAL, WA

Stacey, Practice Manager

The vets are happy with the size & length of the Perfuvet Plug and like the extra ports.

PERFUVET DUO

PANANIA VET CLINIC, NSW

Leanne, Practice Manage

Better quality than our previous product. Not pulling apart at connection for portals. 2 portals as compared to some other giving set.

PERFUVET® DUO

Premium IV admin set for small animals with two injection ports. Compatible with most IV pumps. Excellent quality tubing to avoid kinking.

- Calibration: 20 drops/ml.
- 200 cm Admin set: PVC tubing.
- Luer-Lock.
- Two injection site ports at 10 cm and 110 cm from the catheter.
- Convenient clear and soft drip chamber to allow an easy start.
- On/off clamp.
- Sharp piercing spike.
- Flow control roller clamp.

Sold individually or in boxes of 12 IV sets.

Code Product 157395 PERFUVET® DUO

PERFUVET® PLUG

IV admin set for small animals with two injection ports. PERFUVET® PLUG is an admin set with an extension set. Allows you to disconnect the extension part at 25 cm from the catheter. Compatible with most IV pumps. Premium quality tubing to avoid kinking.

- Calibration: 20 drops/ml.
- 200 cm Admin set: PVC tubing.
- Luer-Lock.
- Two injection site ports at 10 cm and 110 cm from the catheter.
- Convenient clear and soft drip chamber to allow an easy start.
- On/off clamp.
- Sharp piercing spike.
- Flow control roller clamp.

Sold individually or in boxes of 12 IV sets.

Product Code 157397 PERFUVET® PLUG 25 CM EXTENSION SET INCLUDED: 2 IN 1!

2 INJECTION PORTS

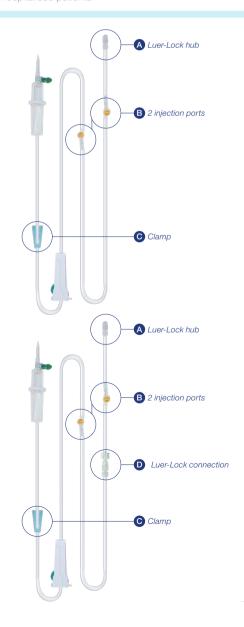

PERFUVET MICRO

GARDEN CITIES VET CLINIC, WA Simon. Vet

I like the Perfuvet Micro giving set because we don't have any IV pump. It is lovely to have some degree of metered control of the flow rate. We do make sure to hang the I/V bag as high as possible to maximise the accuracy. Works well in small to medium dogs and cats.

BYFORD VET HOSPITAL, WA

Brooke, Practice Manager The Perfuvet Micro is convenient; we use it for our anesthetic and hospitalised patients.

ACCURATE FLOW REGULATOR

K-STAR

Star shape device, to use on admin sets to avoid kinking. It helps secure the catheter, and facilitates fluid flow. Quick and easy, it fits on standard tubings. Can also be used as a J Loop connector.

INJECTION PORT

Small see-through injection ports with luer-lock and wide injection platform.

Sold in boxes of 12 injection ports. Singly sterilised and wrapped.

TESTIMONIALS

K-STAR

GARDEN CITIES VET CLINIC, WA Simon, Vet

The K-star is fantastic, really simple. Nice tool.

CAPE CREATURES VETERINARY HOSPITAL, WA

Genene, Head Vet Nurse The K-star is fantastic to keep IV drops and avoid tubing kicking; really easy to use AND re-usable.

PERFUVET® TWIST

Let's take away some of your day-to-day worries with our new PERFUVET® TWIST.

This new device prevents patients from getting tangled up in the tubing.

Composed of a reusable rotating base placed on the cage ceiling and a spiral extension set, this is the best combination for patients to move freely and prevent fluid flow obstruction. Why do you love it?

- When patients walk in circles in the cage the spiral tubing will follow their movements, thanks to the rotating base.
- Tubing will not tangle around the animal and will be less inclined to kink thanks to its spiral shape.
- It is ideal for hospitalized patients, overnight IV therapy, and patients with neurological disorders.
- It will improve safety and save time.

Ready to use kit includes:

- One grey base with an adhesive backing for permanent attachment to the top of the cage.

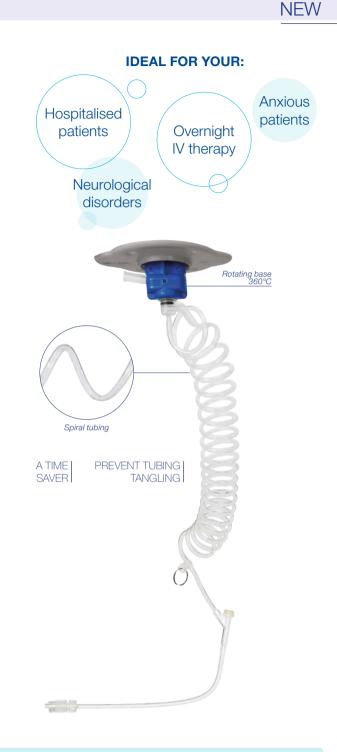

- Two blue shells connecting the extension set to the base.
- Three sterile 3 meters spiral extension sets with collar ring.

Sold as a kit including one base, two blue shells and three sterile spiral extension sets.

Code	Description
157450	Perfuvet® Twist kit (1 base, 2 blue shells and 3 spiral extension sets)
157451	3 spiral extension sets
157452	Set of 2 blue shells

PERFUVET TWIST

WYNYARD VET CLINIC, TAS Jane, Vet Nurse

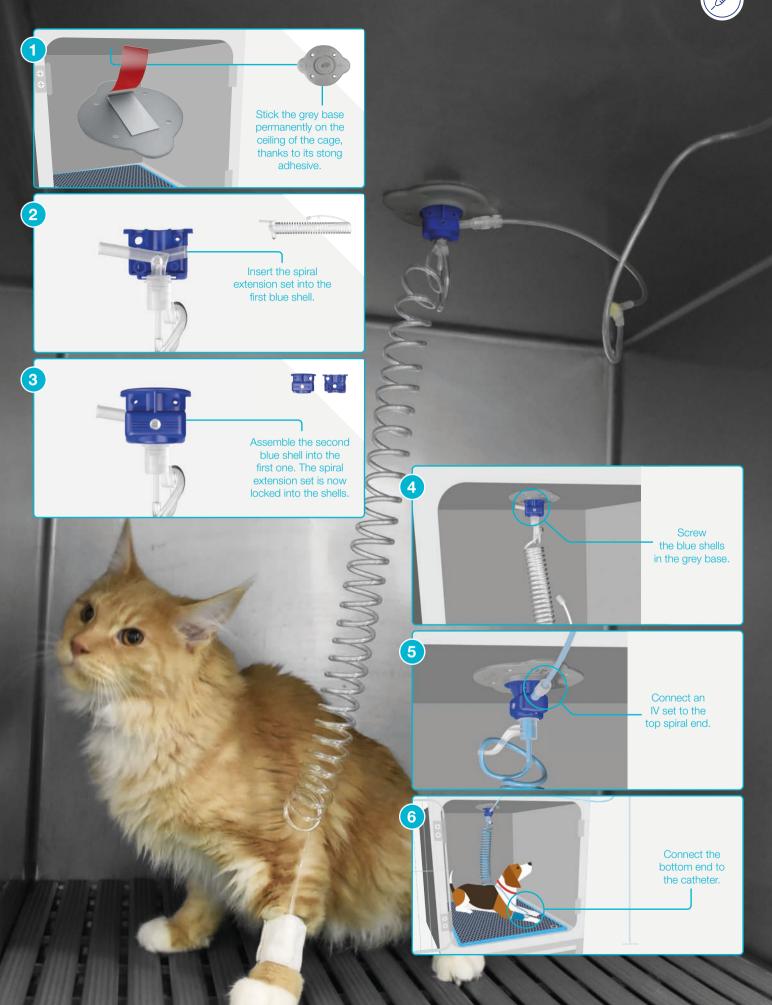

The Perfuvet Twist is brilliant! We used it with a hospitalised dog who didn't get tangled in the cage.

COMPANION ANIMAL PRACTICE, NSW Dylan, Head Vet Nurse

We have definitely been using the Perfuvet twist. They are a great product, each time we use them they are easy to install and the animals are about to move around the cage freely.

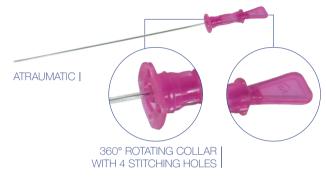

UROLENE® URINARY CATHETERS

UROLENE® CAT

High quality sterile urinary cat catheter featuring a rotating suture collar to maintain secure positionning.

- 360° rotating collar with four stitching holes. Extra comfort for the patient, and prevent the catheter being removed by the cat.
 For a perfect fit, choose between:
- Closed rounded end with two side holes: atraumatic, and easier to insert into the urethra.
- Open end: ideal to unblock a cat with urethral obstruction.
- Luer-Lock hub: easier for urine collection.
- Made of medical grade elastomer of Polyether Block Amide providing a great compromise between rigidity and flexibility. Non-reactive
- material, ideal to leave in, up to three days.
- DEHP-free & radiotransparent.
- Available in 3 sizes: open or closed end and colour coded (blue: 2.5FG, pink: 3FG, green: 4 FG), with or without stylet.

Sold individually or in boxes of 12 catheters. Singly sterilised and wrapped.

UROLENE® DOG

High quality sterile urinary dog catheter.

- Rounded closed end with two side holes: atraumatic and easy to insert into the urethra.
- Excellent balance between flexibility & rigidity.
- Luer-Lock hub: easier for urine collection.
- Made of medical grade Polyamide.
- DEHP-free & radiotransparent.
- Available in 5 sizes, colour coded according to the size.

Sold individually or in boxes of 12 catheters. Singly sterilised and wrapped.

URINARY CATHETER

ELTHAM VETERINARY PRACTICE, VIC

Amanda, Head Vet Nurse

Urolene catheters are so nice and smooth, compared to others. The material makes them easy to insert into patients.

LISMORE VET CLINIC, NSW

Richard, Vet

We've been using Genia urinary catheters for years. They don't spin too much around at the junction and come in several sizes.

CROYDON VET CLINIC, VIC

Tara, Practice Manager Genia urinary catheters are easy to work with; the vets like them.

GREENCROSS VETS ARMADALE, WA Venessa, Practice Manager

Genia urinary catheters are so easy to use ! They go through really well. They have as well a wide size reference, to fit them all! Cat catheters: We like the fact we can easily stitch the base in. Dog catheters: They are durable. They're nice and sturdy, without being too stiff.

THE VET GROUP WOLLASTON, VIC Libbie, Practice Manager

We like the fact we can stitch the urinary catheters. They are really comfortable for the patients.

The BEST for my PETS !

What is Vétopop?

The story began when we - as a veterinary supply company - asked an important question: how can we help to improve animal's overall well-being? With this goal at the forefront of our minds, we aim to create stimulating & fun products for our four-legged friends.

Where to find Vétopop products?

Vétopop products are supplied through veterinary clinics only.

Which Vétopop products?

Ideal for pet owners looking for a way to optimise time with their animal using fun products. Dogs & cats need a combination of physical activity and mental stimulation. Vétopop products will help to encourage movement, mental stimulation and learning.

They are designed to complement your veterinary services by helping in weight management (slow feeder bowls), alleviating boredom (bouncing balls and sea urchins), encouraging dental health (dental toy), promoting mental stimulation (puzzles). We also provide a range of harnesses and cooling vests, to provide extra comfort during the summer months.

You will love to use and share Vétopop products with your clients.

Rotating rubber dental toy for dogs. Durable dog toothbrush promoting oral health.

Textured bumps and ridges help removing dental plaque.

Can be disassembled to add some treats or take some rings off to give more room.

No more boredom: the dental toy keeps your animal entertained.

Made of durable elastomer: light and sturdy.

Dishwasher safe !

Easy to clean & dishwasher safe.

Length 14 cm Diameter 6 cm

ode 700450

TESTIMONIALS

DENTAL TOY

Jacqui & Arlo, Pet Owner "The dental chew toy is really good for her because she loves chewing and hasn't been able to destroy it yet which is saying something for her."

Treat dispenser puzzle

Wooden interactive puzzle feeder for cats and dogs.

Place dry food or treats in the compartments and let your pet play with the sliding blocks to reveal food.

Interactive game that boosts pets' mental stimulation and keeps them engaged.

Can be used to slow down eating.

Made of water-resistant composite wood fibre.

Handwash with soapy water.

Sold individually.

SEA URCHIN

MURRAY BRIDGE VET CLINIC, SA Kirstie, Vet Nurse

"Our border collie puppy Nova loves the high bounce and compact size of the urchin toy. Especially when there's food stuffed in it."

TESTIMONIALS

POP BALL MURRAY BRIDGE VET CLINIC, SA Kirstie, Vet Nurse

"Our puppy loves the Vétopop Boucing Ball. She's often nawing on it or just carrying it around. It's the only ball she will actually go fetch (won't bring it back though!). Definitely one of her favourites and is still in perfect condition despite her needle sharp teeth (she's only 16 weeks old)."

Bouncing ball

Treat dispenser bouncing ball for dogs and cats. Keep your pet entertained for hours. Prevents boredom and encourages physical activity. Can be used with treats. Made of durable elastomer. Sold individually.

Size S (small dog) Diameter 6 cm code 700400 Size M (medium/large dog) Diameter 9 cm code 700402

Slow feeder bowls

vétopop

NEW

BIO Slow feeder bowl

The eco-friendly slow feeder bowls for cats and dogs.

Plant-based material: made of vegetal fibre coming from sustainable forests.

Helps reduce greenhouse gas emissions.

100% biodegradable.

COSYPOP

The ideal surgical and recovery bed!

Our COSYPOP® is a multi-purpose bed made of our well known COSYPAD® mat, surrounded by a thick and comfy headrest via a zip. Completely detachable. Easy, cosy, happy!

WULTI-PURPOSE - Ideal for SURGERIES: it provides insulation and keep patients off cold surfaces. The COSYPOP® is particularly helpful for airway procedures, dental surgeries and orthopaedics, thanks to its thick non absorbent headrest. Ideal for in clinic RECOVERIES: the bed minimizes pressure on muscles, joints, and prevents bedsores. It is non-absorbent: liquids pass through, keeping animals dry and it includes a non-slip base for stability. Can also be used as a PET BED at home, or as a BASKET for PUPPIES.

MATERIAL – Unique meshed material that makes the bed breathable and non absorbent. It provides insulation and keeps animals dry at all times. The headrest and the base are made of the same components.

NON-SLIP BASE — Anti-slip base to keep the COSYPOP® stable on surgery table, in the cage or kennel.

▲ MACHINE WASHABLE — The base and the surrounded headrest can be washed separately by unzipping them. Up to 40°C on gentle cycle. Quick drying. No tumble dry.

TESTIMONIALS

COSYPOP

BRISBANE VETERINARY SPECIALIST CENTRE, QLD Kate, Vet

The Cosypop has been a hit with the team. It's extremely useful for patients with poor bladder control, to help drain away moisture and avoid urine scalding. The soft cushioning in the base is also very comfortable for our non-ambulatory patients, and the raised edges allow us to easily keep their head elevated. It's super simple to clean, and fits perfectly in a standard size cage. We often reach for it if we have patients with tick paralysis, a neurological disorder, or just any animal that needs a particularly comfy spot that feels like a more homely dog bed.

Cooling vest

Dog cooling vests are a great way to ensure the safety of the dog during hot, humid conditions. When drinking cold water and shade are not enough, a cooling vest can provide extra comfort to ward off heat exhaustion or heatstroke.

Dunk the vest under cold water, wring it out and put in on the animal: the micro-perforated cooling fibres will keep the dog cool for several hours. Improves animal well-being and reduces stress.

Do not leave the vest on the dog once it is dry.

Velcro fastening.

Reusable.

Hand wash only.

Sold individually.

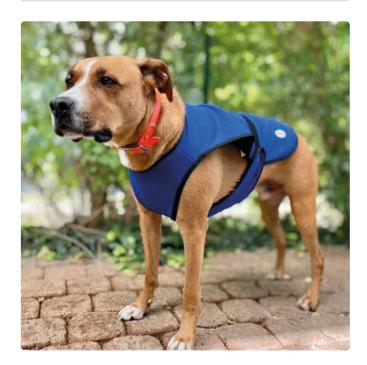

COOLING VEST

ROSEBUD PET VET, VIC Robyn, Vet

The Cooling Vests are very good for Aussie summer, as they keep the dogs cool.

TORQUAY ANIMAL HOUSE, VIC Ann, Practice Manager

We use the cooling vest for overheating patients. It works perfectly as it provides the right cooling amount for the animal.

HOOF TESTERS

Stainless steel hoof testing forceps.

Code	Shape	Total length
227100	Flat	350 mm

SHARPENING SET

Sharpening kit for hoof knives and hoof scrapers.

- The kit is composed of 2 items:
- 6 mm diameter cone shape stone for use in an electric drill : ideal for sharpening inside the hook.
- 10 cm long half-round medium-grit stone : ideal for all the long edges of a hoof knife.
- Supplied in plastic tube.

Sold individually.

HOSPITALIZATION

EQUIPLAST®

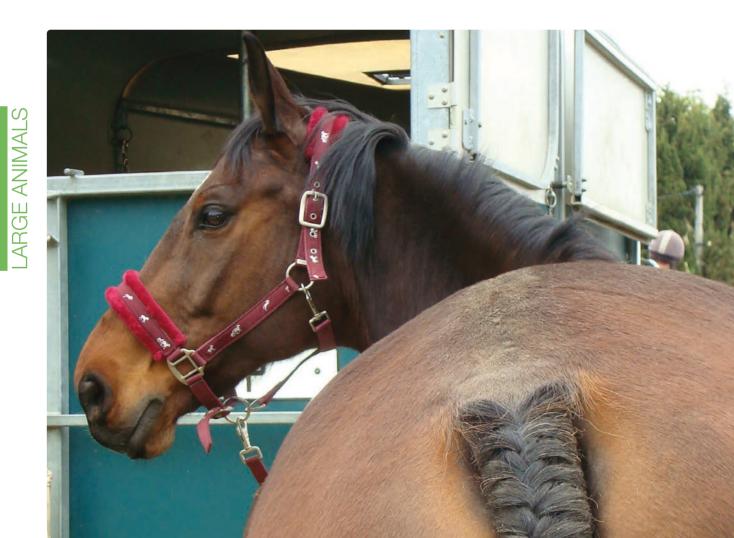

Thick layer of highly absorbent cotton wool enclosed in an absorbent cotton gauze cover. High density padding used as a wound dressing to protect against bumps. Great for support, padding, protection and insulation.

- Highly absorbent, it retains any fluid exudate into the dressing.
 The fibres don't stick to the wound as there is a low adherent surface: preserve scar tissues.
- Ideal for equine first aid, stall wraps or shipping wraps.
 Supports and protects fetlocks, hocks and tendons.
 Promotes blood circulation for improved healing.
- Sterilizable.
- Can be cut to the required dimensions.
